

Cut costs and time with Scandit and SAP Fiori combined

Scandit. Loved it.

Revolutionize your retail business processes and user experiences by easily and quickly integrating SAP Fiori for S/4HANA with Scandit's award-winning computer vision and augmented reality (AR) on any mobile device.

Scan with your smart device to try a demo:

Benefit from the best of both worlds

Try the Demo ↑

<p>✓ Reduce costs by eliminating the need for dedicated scanning devices.</p>	<p>✓ Automate store operations and cut the time it takes to manage stock inventories by up to 40% using Scandit's MatrixScan.</p>
<p>✓ Empower employees with real-time information to make the right decisions on the spot.</p>	<p>✓ Increase efficiencies with the power to scan in poor light, at distance and even when barcodes are damaged.</p>

Simplify store operations

Use the Scandit Barcode Scanner SDK to easily integrate with SAP Fiori and use mobile data capture and augmented reality feedback to increase the efficiency of tasks like:

Click & Collect	Clienteling	Shelf Management
Mobile Point of Sale (mPOS)	Store Walkthrough	Price Label Verification
Stock Taking and Inventory Management		

About Scandit

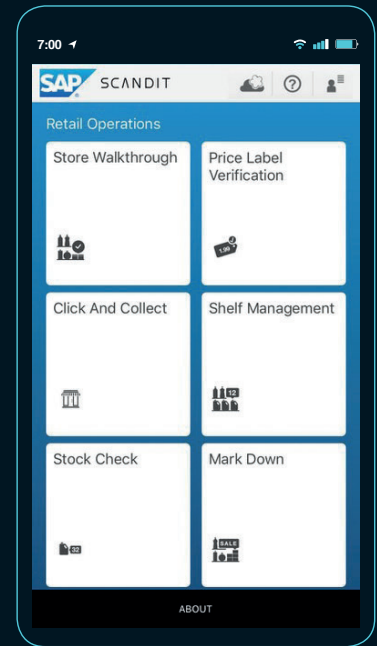

At Scandit, we help enterprises harness the power of mobile computer vision to bring unrivaled scanning performance to mobile devices for their customers and employees.

We bring the physical and digital worlds together by changing the way people interact with everyday objects. It's establishing a new paradigm of employee and customer engagement across retail, post, parcel & express, supply chain logistics, manufacturing, government, healthcare, and many other sectors.

About SAP Fiori

SAP Fiori delivers a role-based, consumer style user experience across multiple business tasks and devices.

The user-centric design of SAP Fiori for S/4HANA focuses on the way employees work and offers a variety of business benefits including increased productivity, transparency on what action and decisions are required in a quick and timely way plus increased levels of user satisfaction.
